## Prestige Medical UK sales team awarded City & Guilds certificate in Decontamination of Dental Instruments

Prestige Medical is delighted to announce that their sales team has recently achieved accreditation by City & Guilds in Decontamination of Dental Instruments following an intensive training course at Eastwood Park.

The course covered a variety of topics including: Microbiology and infection control, HTM 01-05 policies and procedures, design of the dental decontamination area and the interpretation of test records.

David Robinson, Commercial Director for Prestige Medical, said:

“Prestige Medical is committed to providing the expertise needed by practices to help them interpret what can sometimes be the confusing requirements of HTM 01-05 regarding the decontamination of dental instruments. We believe we are the first equipment manufacturer to have invested in City & Guilds training in order to give our sales team the formal skills they need to provide dentists with the assurance that are receiving the genuine assistance and advice their practice needs.”

More information is available from Prestige Medical direct by calling 01254 844 103 or email to [sales@prestigemedical.co.uk](mailto:sales@prestigemedical.co.uk)
