

Press release

Prestige Medical announces launch of new Universal Hand Piece Cleaner

Prestige Medical has announced the launch of a new Universal Hand Piece Cleaner which they say is designed to clean, oil and sterilize dental hand pieces in just 12 minutes.

Busy dental practices need a quick turnaround of hand pieces, but waiting whilst they are manually cleaned, oiled and then sterilized has meant that the only alternative has been to buy extra sets in order to keep up with demand!

They say the Universal Hand Piece Cleaner with its quick, 12 minute cycle, will help to speed up throughput and therefore significantly reduce the number of hand pieces the dentist needs to buy — considerably reducing costs.

Consistently effective treatment of hand pieces can also help to increase their life and reduce the need for maintenance.

The Universal Hand Piece Cleaner is supplied complete with a choice of 6 hand piece adapters. Installation, commissioning and training is free and is carried out by Prestige Medical service engineers.

More information is available from Prestige Medical direct by calling 01254 844 103 or email to sales@prestigemedical.co.uk
